Subject: RE: Status of Carryover WQS

David, I was just reviewing the Midyear report for the 106 Grant and it says:

The public comment period ended 12/8/17 on the final proposed amendments to the bacteria, ammonia, cadmium and 94 human health criteria. Staff presented final recommendations (for all but the ammonia criteria) for approval by the VA State Water Control Board at their 8/21/18 meeting. The amendments are currently in Executive Review (day 162 in Governor's Office on 4/17/19), and then be submitted for EPA review and approval to become effective. For ammonia, the 2018 VA General Assembly passed legislation that required development of a Phased Implementation Program (PIP) to accompany the criteria revisions. The draft PIP was noticed for public review/comment from 8/6/18 – 10/5/18; staff then presented the final recommended amendments to the SWCB at their 12/13/18 meeting, which were approved. The ammonia criteria amendments are now in Executive Review and following approval will be submitted to EPA for approval and an effective date.

Do you think it should have the post-adoption 30-day notice step before it is sent to EPA?

For our planning purpose, short of just keep bugging you, is there a better way to track your amendments package after the public comment period?

So confused I thought for Bacteria/cadmium/human health the Board gave approval last year and was in the Gov's office? What is the post adoption comment period? Does it then go to the Gov's office again?

Bacteria/cadmium/human health is in a post-adoption comment period that is over July 24th. Y'all should see that shortly afterwards. Ammonia is still at the Gov's Office under review. Once it's released a post-adoption 30-day notice will be published as for the above items.

Just checking in again, what is the status of the carry over packages?
